Furniture Care Instructions

Room Climate Control

Wood when first cut contains more than 50 percent water. When it is prepared for furniture construction, it is placed in a kiln, and the moisture content is brought down to 8 to 10 percent. Wood is porous and responds to its environment. If the room has high humidity, it will absorb it and expand. If the humidity is low, it will lose moisture and shrink.

It is important to avoid too much humidity or too little humidity. Furniture should not be placed close to air-conditioning outlets, fireplaces, radiators, space heaters, humidifiers or dehumidifiers. Exposure to extreme variations of temperature and humidity can damage any fine wood product.

The Ideal Environment for Fine Furniture

Fine wood furniture will have fewer problems when its environment is controlled at a temperature between 65 and 75 degrees, and a relative humidity between 35 and 40 percent. Wood placed in an environment outside of those limits can and will shrink or expand, and may develop some small cracks which are not material or structural defects.

Avoid Direct Sunlight

Keep the furniture out of direct sunlight. Ultraviolet rays will fade colors, and in some cases darken them. It can also cause crazing or hair line cracks in the finish. White finishes will yellow naturally over time, and exposure to direct sunlight will hasten this natural process. Some woods darken naturally over time; this is not considered to be a quality defect.

Proper Storage

If you need to put your furniture in storage for any period of time, do not store it in a damp basement or a hot dry attic. Allow air movement around the furniture, and do not stack anything on it.

In General

- Protect furniture surfaces from hot or extremely cold items.
- Use coasters under hot or cold beverages.
- Do not use synthetic fabric under accessories or lamps.
- Protect tops from pens, marks and crayons.
- Oils from potpourri and other scented items can damage the furniture finish.
- Do not drag items across the surface of the furniture.
- Allow the surface to breathe by rotating your accessories and lamps.
- Do not over polish the furniture. Do it only two or three times a year. Over polishing can distort the natural finish of the product.
- Do not wax the furniture as wax build up can destroy the natural finish of the product.
- When moving furniture, always lift the unit. Pushing or dragging might cause damage to legs.
- Keep the furniture level so doors and drawers open and close freely.
- When cleaning your furniture, use a non-toxic, non-abrasive cleaner. Mix a solution of water with a small amount of mild dishwashing liquid. Apply to crib surface with a soft damp cloth, lightly dampened in solution. After cleaning, dry completely with a soft dry cloth.

WARNING

- Failure to follow these warnings and assembly instructions could result in serious injury or death.
- To reduce the risk of SIDS, pediatricians recommend healthy infants be placed on their backs to sleep, unless otherwise advised by your physician.
- Check this product for damaged hardware, loose joints, missing parts or sharp edges before and after assembly, and frequently during use.
- **DO NOT** use this crib if any parts are missing, damaged or broken. **DO NOT** substitute parts. For replacement parts and instructional literature contact Fisher's Quality Products, 1331 May Post Office Road, Quarryville, PA 17566. 717-786-8342
- **DO NOT** use a water mattress with this crib.
- Read all instructions before assembling crib. KEEP INSTRUCTIONS FOR FUTURE USE.
- If refinishing, use a non-toxic finish specified for children's products.

STRANGULATION HAZARD:

- Strings cause strangulation! Do not place items with a string around a child's neck, such as hood strings or pacifier cords. **DO NOT** suspend strings over crib or attach strings to toys.
- To help prevent strangulation, tighten all fasteners. A child can trap parts of body or clothing on loose fasteners.
- **DO NOT** place crib near window where cords from blinds or drapes may strangle a child.
- Infants can suffocate on soft bedding.
- Never add a pillow, comforter or padding
- Never use plastic shipping bags or any plastic film as mattress covers, because they can cause suffocation.
- Infants can suffocate in gaps between crib sides and a mattress that is too small. ANY MATTRESS USED IN THIS CRIB MUST BE AT LEAST 27¹/₄ INCHES (69 CENTIMETERS) BY 51⁵/₈ INCHES (131 CENTIMETERS), WITH A THICKNESS NOT EXCEEDING 6 INCHES (15 CENTIMETERS). The dimensions of the mattress shall be taken from seam to seam or edge to edge where appropriate.

FALL HAZARD:

- When child is able to pull to standing position, set mattress to lowest position and remove bumper pads, large toys and other objects that could serve as steps for climbing out.
- When the child is able to climb out or reaches the height of 35 inches (90 centimeters), the crib shall no longer be used.
- When storing crib, use caution because extreme changes in temperature or humidity can compromise the crib, making it extremely dangerous to your child.
- Use caution when a vaporizer or humidifier is in use. Always aim vapor away from the crib as well as any other wooden furniture. Prolonged periods of humidity in storage as well as the home can compromise the crib.
- Avoid using vaporizers and humidifiers for prolonged periods of time.
